

Genuine Parts and Repair

If you find that a part is faulty or missing from your Meccano Set...

Simply provide the code of the affected part (see page 3 of your Meccano instruction manual for a full illustrated parts list) to our Meccano parts and repair specialists, Meccparts.com, and they will send a replacement part out to you straight away.

Due to the component nature of Meccano sets, faulty and missing parts can easily be replaced individually without compromising the remainder of the set.

After all, it's not until you are part way through building a model that you would tend to discover a faulty or missing piece, and you probably don't want to have to lose all of your hard work by starting over again with a full replacement set just for the sake of that one part!

For all enquiries for Meccano spare parts and repair, please contact:
